

ESG+P Solutions

Environmental, social, governance and political risk

Expectations are shifting around how insurers and re-insurers incorporate Environmental, Social, Governance and Political risks into investment and underwriting analysis. Protests, shifting regulation and shareholder activism pose growing challenges for businesses, investors and supply chains. How you identify and address these issues will be crucial for averting business losses over the long term.

How can we help you?

For almost 20 years Verisk Maplecroft has helped leading organisations effectively manage the challenges posed by increasingly uncertain and volatile operating environments.

Our unbiased, independent experts have a deep understanding of interconnected ESG and political risks, shifting stakeholder expectations, and industry-specific business contexts. Drawing on our proprietary data and trusted advisory services, we can create bespoke solutions to help you:

Identify and monitor ESG+P risks and opportunities

Conduct in-depth ESG+P due diligence

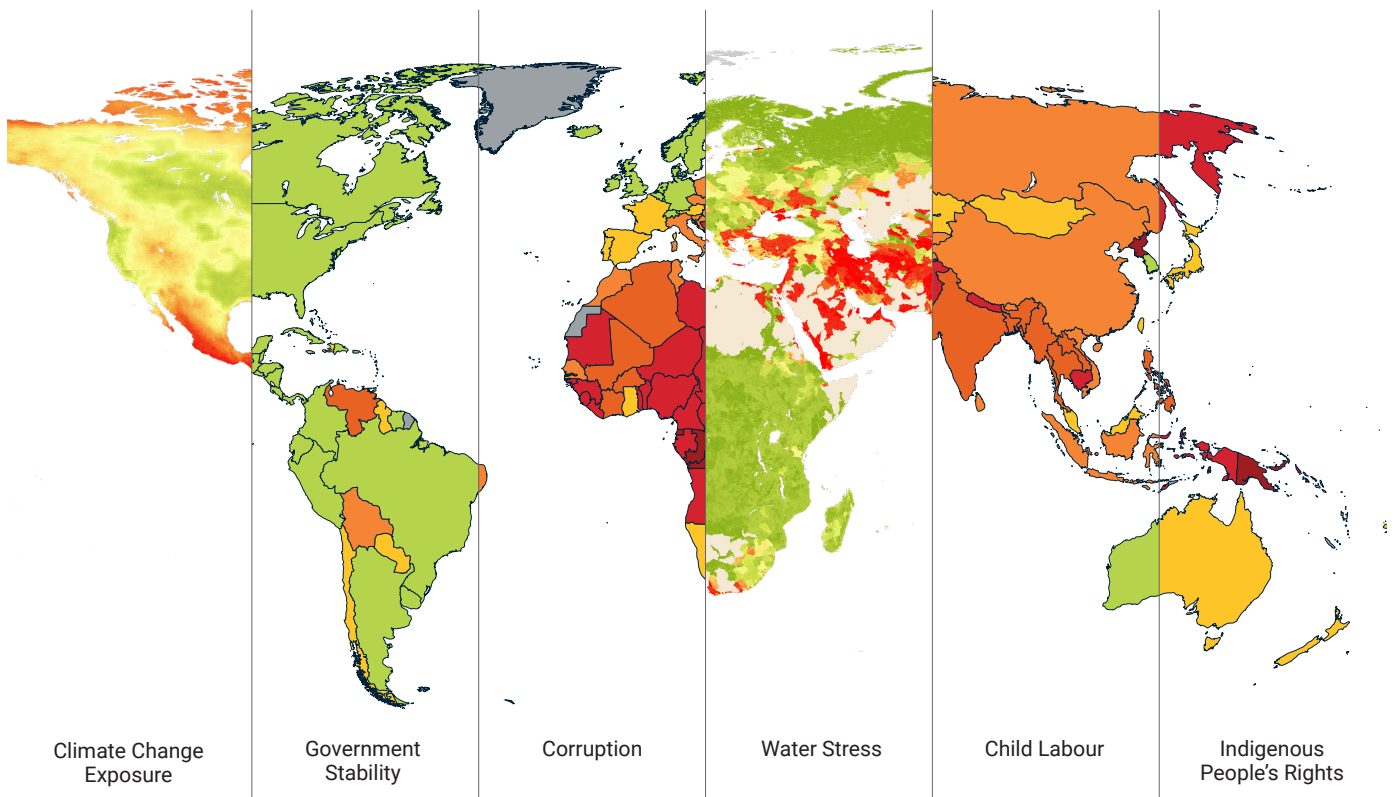

Develop and implement your ESG+P risk management strategy

Why our services?

 <p>Leading proprietary datasets</p>	 <p>Trusted independent experts</p>	 <p>Tailored ESG+P company-specific solutions</p>	<ul style="list-style-type: none">✓ Understand risks and opportunities✓ Enhance decision-making✓ Integrate ESG✓ Improved risk management✓ Tech-enabled✓ Create capability✓ Drive performance

Our proprietary global risk data

We offer insurers and re-insurers a single source of ESG data and advisory that integrates with risk management, underwriting and investment management, enabling insurers to leverage the inherent synergies that exist between each.

We support both sides of the balance sheet and functions

We help businesses understand ESG risks, enhance decision-making and drive performance - by providing a unique combination of geospatial risk data, predictive analytics and expert insight. We deliver value for both asset and liability sides of the balance sheet and functions such as risk, strategy, and sustainability.
